

Vernon Electric's community-owned solar project, powered by Clean Energy Collective, is a new idea in renewable energy - a local community-based solar solution built right here in your community. Now, as a Vernon Electric member, you can own fully maintained solar panels in Vernon Electric's community array. Without changing your property, you can save money with local clean energy that's easy, accessible, and affordable!

Easy For Everyone

-  Available to **all Vernon Electric members** on a first-come, first-serve basis - residential, business, nonprofit, renters, owners
-  **Nothing** on your home or office building
-  **Flexible** sizing to fit any budget
-  Single **one-time price**, no additional fees
-  Available discounts and credits are **included** in the price
-  Comprehensive **Operations and Maintenance** program included
-  Optimally situated and fully maintained solar arrays for **maximum power generation**
-  If you move locally, your bill credits and savings **move with you**
-  If you move from the area, **you can sell** your system
-  Internet and smart-phone monitoring to **easily track** performance and savings

Community-Owned Solar is for Everyone

Substantial Savings

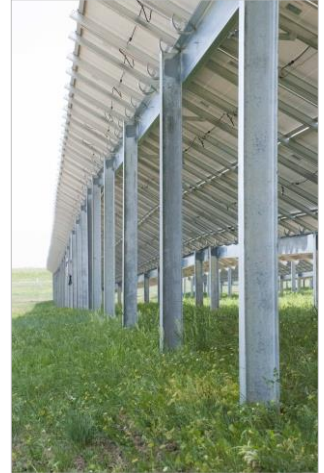

-  **Monthly credits** for the power produced on your Vernon Electric bill
-  Protect against inflation – **your savings increase as energy prices rise**
-  Price: **\$600 per panel**

For a limited time, Vernon Electric is offering a special rebate in addition to CEC's panel price. With Vernon Electric's **rebate of \$71 per panel** (\$0.23/Watt), you can reserve a community solar system for just **\$600 per panel** (\$1.97/Watt).

-  Projected Initial Annual Payback: **6.2%**
